### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows: nonelected claims 20-38 without traverse have been canceled.

The abstract has been combined into one paragraph as follows:

### **ABSTRACT**

A liquid crystal display using horizontal electric field and a method of fabricating the liquid crystal display device that are capable of reducing the number of mask processes are provided. The liquid crystal display of horizontal electric field applying type has a thin film transistor array substrate, with a conductive film connected to a gate pad, a data pad and a common pad of a thin film transistor on the substrate. The pads are exposed on the thin film transistor array substrate.

### **REASONS FOR ALLOWANCE**

2. Claims 1-19 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record does not anticipate nor render obvious to one ordinary skilled in the art a liquid crystal display of horizontal electric field applying type (in-plane-switching) comprising a combination of various elements as claimed, more specifically, at least the following combinations: a pixel electrode connected to the thin film transistor and formed to produce horizontal electric field along with the common electrode in the pixel area; a gate pad formed with at least one conductive layer included in the gate line; a data pad formed with at least one conductive layer included in the data line; a common pad formed with at least one conductive layer included in the common line; a passivation film exposing the gate pad, the data pad and the common pad, which are formed on a substrate to form the thin film transistor array substrate; a color filter array combined with the thin film transistor array substrate, liquid crystal material being filled between the color filter and the thin film transistor array substrate; and a conductive film directly connected to the gate pad, the data pad and the common pad, the pads exposed on the thin film transistor array substrate.

### **CONTACT INFORMATION**

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
